

AGS 4023

WHEAT

2023 OFFICIAL UNIVERSITY TRIAL RESULTS

- Rowan, NC @ 106.1 Bu/Acre
- #2 Griffin, GA @ 96.7 Bu/Acre
- #7 South GA Avg @ 69.6 Bu/Acre

MANAGEMENT CONSIDERATIONS

- Medium Maturity
- Moderate Vernalization Requirement
- Top choice for FHB Tolerance
- Top End Yield potential - Similar to AGS 2024
- Good choice for growers passively planting wheat in lower intensity management

AGRONOMIC CHARACTERISTICS

Test Weight	Very Good
Relative Maturity	Medium
Straw Strength	Good
Vernalization Requirement	Moderate
Awned	Yes
Plant Height	Medium

Data taken from Official University Trials on Released Varieties

DISEASE & PEST RESISTANCE

Leaf Rust

Stripe Rust

Glume Blotch

Powdery Mildew

Barley Yellow Dwarf (BYD)

Soil Borne Wheat Mosaic (SBWM)

Hessian Fly

Fusarium Head Blight (SCAB)

Fair Good V. Good
